EMPLOYMENT AND UNEMPLOYMENT, OCTOBER TO DECEMBER 1969

Table	CONTENTS	Page
	1. EMPLOYED WAGE AND SALARY EARNERS	
	Explanatory notes	2
1.	Civilian employees, private and government, and defence forces : Australia, June 1966 to December 1969	4
	Wage and salary earners in civilian employment -	
2.	Seasonally adjusted : Australia, January 1969 to December 1969	-5
3.	States and Territories, November 1968 to December 1969	5
4.	Industry groups and sub-groups : Australia, September 1969 to December 1969	. 7 6
5,	Manufacturing industry, principal sub-groups : Australia, October 1969 to December 1969	8
6.	Industry groups : Northern Territory, September 1969 to December 1969	9
7.	Industry groups : Australian Capital Territory, September 1969 to December 1969	9
8-10.	Industry groups and sub-groups : States, October, November and December 1969	10
11.	Government bodies: States and Territories, October 1969 to December 1969	1 6
12.	Commonwealth bodies : December 1969	18
	2. EMPLOYEES IN LARGER PRIVATE FACTORIES	
o kon . Simbolik is	Explanatory notes	20
	All industries, and industries excluding food, etc	
13.	States, February 1969 to March 1970	21
14.	Industry groups, six States, February 1969 to March 1970	22
	3. REGISTERED UNEMPLOYED AND NUMBER ON BENEFIT	
15.	Persons registered for employment with Commonwealth Employment Service, June 1966 to March 1970	23
16.	Persons receiving unemployment benefit, June 1966 to March 1970	24
	4. JOB VACANCIES	
17.	Vacancies registered with Commonwealth Employment Service, June 1966 to March 1970	25

1. EMPLOYED WAGE AND SALARY EARNERS

The new series of estimates contained in this section, except those relating to government employees and defence forces, are based on comprehensive data derived for the purpose from the population census of June 1966. They replace those previously published in issues of the Employment and Unemployment bulletin (Reference No.6.4) to February 1969. The statistics shown for June 1966 are referred to herein as "benchmarks". For the period from July 1966 to date the figures shown are estimates designed to measure month-to-month changes in the sector of employment to which the benchmarks relate.

- 2. Between population censuses the employment data are obtained from three main sources, namely, (a) current pay-roll tax returns; (b) current returns from government bodies; and (c) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. At June 1966 recorded employment obtained from the forgoing sources accounted for about 85 per cent of the total number of employees in the industries covered, as determined by the census.
- 3. The figures in this section, except those in Table 1, relate only to civilian wage and salary earners, not the total labour force. They therefore exclude employers, self-employed persons, unpaid helpers and defence forces. Also excluded, because of the inadequacy of current data, are employees in agriculture (formerly referred to as rural industry) and in private domestic service.
- 4. The new series are generally at higher levels than the old, for two reasons: (a) the adoption of a new definition of the labour force in the 1966 population census, from which the benchmarks for the new series were derived and (b) the inclusion of full-blood Aborigines. The new definition resulted in the inclusion of a considerable number of part-time employees (mostly females) who had previously been excluded.
- At the 1961 and earlier censuses the labour force comprised those who were engaged in an industry, business, profession, trade or service at the time of the census (including those on long-service leave, etc.) and those out of a job at the time of the census but who were usually engaged in an industry, business, etc. Those persons who were not stated to be so engaged were required to be described as students, pensioners, engaged in home duties, etc., and were automatically classified as not being in the labour force. It is believed that many persons particularly married women classified themselves according to their main or usual activity or status (e.g. home duties) and overlooked the part-time or casual employment that they had at the time of the census. Had the census questions been designed to obtain particulars of each person's actual activity during a specified period (as the 1966 population census labour force questions were), so that all employees who did any paid work at all, or who had jobs, would have been included, these persons would have been counted in the total of employed wage and salary earners.
- 6. As the scope of the monthly employment series is similar to and subject to the same limitations as that of the population census benchmarks on which they are based, the totals shown by the old series did not necessarily represent, at any point of time, the total numbers of employed wage and salary earners, because of the exclusion of many part-time workers.
- 7. The concepts and definitions adopted at the 1966 census conformed closely to the recommendations of the Eighth International Conference of Labour Statisticians. At the census the following questions were asked in respect of all persons fifteen years of age and over:

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)?"

"Did the person do any work at all last week for payment or profit?"

Provided he had not been temporarily laid off by his employer without pay for the whole of the week, a person who answered "yes" to either of these questions was classified as employed. Persons in this category who were stated to be "working for wages or salary", except members of the defence forces, or persons employed in agriculture or private domestic service, have been included in the benchmarks for the current series.

8. The benchmark figures were derived from particulars recorded for individuals on population census schedules, while the estimated monthly changes are derived mainly from reports supplied by employers, relating to enterprises or establishments. Because the two sources differ in some cases in the reporting of industry, the industry dissection of the census totals has been adjusted to conform as closely as possible to an establishment reporting basis. The figures published herein for June 1966 therefore differ from those published in the series of

census bulletins (Nos. 1.6, 2.6, etc.) which show particulars of the occupational status and industry of the population in each State and Territory, and in other publications which contain population census results. The industry classification used throughout the series is that of the population census of June 1966.

- Qurrent data supplied by reporting enterprises or establishments generally refer to persons on the pay-roll for the last pay-period in each month. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.
- 10. Pay-roll tax returns are lodged at present by all employers paying more than \$400 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organisations specifically exempted under the Pay-roll Tax Assessment Act 1941-1968).
- 11. Particulars of employment obtained from other collections, such as the annual manufacturing census and censuses and sample surveys of retail establishments, are used to check and where desirable to revise the estimates. Some figures in this section are subject to further revision as the results of later censuses and surveys become available.
- Although the series measure reasonably well the short-term trends in employment in the defined field, they may be less reliable for longer-term measurement. There are conceptual differences between benchmark and pay-roll data, and changes in such factors as labour turnover, multiple jobholding and part-time working all affect the trend over longer periods.
- 13. The new series of estimates were issued in a preliminary statement (Reference No. 6.12) on 16 January 1970, for the period June 1966 to June 1969. A special bulletin (Reference No. 6.23) covering the same period, and giving detailed industry figures for each State and Australia and a revised government employment series was issued on 24 April 1970.
- 14. In due course the estimates for periods prior to the population census of June 1966 will also be revised, but on a basis comparable with that of the 1961 census benchmarks, the information needed to revise these benchmarks on the 1966 census basis not being available.

NOTE. Any discrepancies between totals and sums of components in Tables are due to rounding.

.. means nil or less than 50 persons.

Total under other Acts	70.987	25,615	96,602
GRAND TOTAL (b)	249,778	81,020	330,798

⁽a) Includes employees of the Departments of the Parliament, who are appointed under the Public Service Act but to whom special provisions apply.

⁽b) These totals differ from those shown in table 11 because, for persons employed under the Public Service Act, all part-time employees are excluded and employees overseas are included.

2. EMPLOYEES IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau. The survey covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees.

- The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment.
- Employers co-operating in the survey are asked to supply, as at the last pay-day in the month, the number of employees in the factory or on the factory office staff, providing their employment is directly related to manufacture. Selling and distribution staff are excluded.
- Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate figures have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.
- In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.

⁽a) Persons who claimed, when registering with the Commonwealth Employment Service, that they were not employed and who were recorded as unplaced. Includes those referred to employers and those who may have obtained employment without notifying the C.E.S. Includes also persons receiving unemployment benefit (see Table 16). (b) Generally at Friday nearest end of month. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) For details of the methods used in seasonally adjusting these and other series see "Seasonally Adjusted Indicators 1969", issued on 22 May 1969.
